DETAILED ACTION

Response to Amendment

1. In response to the amendment received April 5, 2006:
 - a. Claims 7, 14 and 17 are pending;
 - b. The 112 1st paragraph rejection is withdrawn in light of Applicant's arguments;
 - c. The prior art rejections are withdrawn in light of the cancellation of claims 3, 5 and 6.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

Art Unit: 1745

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 7, 14 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2000-235868 (JP '868) in view of JP 04-190560 (JP '560).

JP '868 discloses a lithium secondary battery wherein: a cathode, anode and electrolyte are encased in a housing having a thickness of 0.5 mm or less (abstract), a cathode active substance comprising a lithium cobalt oxide (paragraph [0023]), and an electrolyte solution containing 50-95% γ -butyrolactone in the solvent (abstract and paragraph [0049] as applied to claim 7).

The housing has a thickness as low as 0.05 mm (paragraph [0064] as applied to claims 7 and 14).

The cathode binder is polyvinylidene fluoride (paragraph [0025] as applied to claim 17).

The difference between claim 7 and JP '868 is that JP '868 does not teach of the lithium cobalt oxide having 0.001-2 at% Nb relative to the cobalt in the composite oxide.

JP '560 discloses adding 0.001-0.4 of Niobium relative to cobalt in a lithium composite oxide active material for lithium batteries (abstract).

The motivation for adding 0.001-0.4 Nb is that it improves the high temperature storage property of the battery.

Art Unit: 1745

Therefore it would have been obvious to one of ordinary skill in the art at the time the claimed invention was made to modify the teachings of JP '868 by adding 0.001-0.4 Nb since it would have improved the high temperature storage property of the battery.

Response to Arguments

5. Applicant's arguments with respect to claims 7, 14 and 17 have been considered but are moot in view of the new ground(s) of rejection.
